

Sintesis Prime RTAF Air-Cooled Chiller

Cooling capacity: 300-2090 kW

TRANE
TECHNOLOGIES

At a Glance:

- Low energy consumption: high full load (EER), seasonal comfort cooling (SEER) and process cooling (SEPR-HT and SEPR-MT) efficiencies
- Ultra wide operating map both on airside and waterside
- Highly configurable product design and options to meet specific performance requirements and budget needs
- Trane design and manufactured semi-hermetic screw compressor technology. Fixed and variable speed versions, plus variable Volume Index models to reach remarkable efficiency levels.
- Trane-patented flooded evaporator CHIL (Compact - High Performance - Integrated design - Low charge) design
- Latest Trane Symbio™ 800 adaptive controller.

Smart, versatile, reliable

Trane RTAF air-cooled chillers are built on the Sintesis™ platform, which means they share many of the same components and technologies, all with a proven reliability record.

With fixed, variable speed or Variable Volume Index compressors with permanent magnet motor, Sintesis™ Prime RTAF units offer high performance and efficiency to all comfort and process cooling (SEPR-HT and SEPR-MT) applications.

The RTAF chillers operate with R1234ze, R513A or R134a refrigerants. They offer 7 different efficiency versions and versatile set of options, such as free cooling and heat-recovery, to further boost the system energy efficiency.

System efficiency with energy saving solutions

RTAF chillers can be equipped with an integrated free cooling system, significantly lowering your operating costs and reducing wear and tear of main system components.

RTAF chillers also offer a total or partial heat recovery option to reclaim waste heat and provide your building with hot water while cooling.

All Trane Sintesis™ chillers use Symbio™ 800 controller and are fully compatible with LonTalk®, BACnet® and Modbus, allowing for easy integration with BMS systems.

Quiet operation

With variable volume screw compressors, variable speed fans and insulation options designed to reduce sound further, RTAF chillers are an ideal choice to keep your building cool - quietly and efficiently.

Standard, low, extra low, and whisper low noise levels are available.

Range description

- The RTAF Prime product range of the Sintesis platform is available in seven efficiency versions:
 - SE, HE and XE with fixed speed compressors
 - HSS, HSE, XSS and XSE with variable speed compressors. XSS and XSE have Variable Volume Index screw technology.
- These can be coupled with three low noise packages (SN, LN, XLN).
- You can also choose between AC and EC fans, and three refrigerants: R1234ze, R513a and R134a.

Trane, leaders in HVAC technology, services and energy solutions.

Our mission is to get it right for our customers and the climate.

Innovative thermal management systems

For all commercial and industrial applications, we offer a broad portfolio of HVAC solutions including heat pumps, chillers, multi-pipe units, packaged rooftops, air handling units and water terminals.

Partner with Trane

Lifecycle Management

From start-up services to full turn-key solutions, all the way to disposal and recycling.

Modernize and optimize

A wide array of solutions to ensure your HVAC equipment is always running at its peak performance, including technology upgrades.

Digital Services

Avoid unexpected cost and downtime thanks to Trane's connected service agreements.

Rental Services

An extensive and modern fleet, for short and long-term rental. Contact our experts for a quote:
rent-trane.com

Trane has a policy of continuous product and product data improvement and reserves the right to change design and specifications without notice.

TRANE

Trane – by Trane Technologies (NYSE: TT), a global climate innovator – creates comfortable, energy efficient indoor environments through a broad portfolio of heating, ventilating and air conditioning systems and controls, services, parts and supply. For more information, please visit trane.eu or tranetechnologies.com.
