

AMV6 OUTDOOR UNITS

All Inverter Multi VRF System adopts the world-leading multi VRF CAN+ communication technology. Besides, new generation of intelligent management control solution and clean and healthy fresh air solution are attached as well, thus the unit is excellent in the aspects of energy conservation, comfort and stability. The capacity is from 22.4kW to 246 kW.

- Heating -30°C~24°C;
Cooling -5°C~24°C
- New type compressor: improved partial load efficiency
- Efficient heat exchange: layered dual-zone heat exchange
- New generation intelligent defrosting: self-adaptive capacity according to system pressure and temperature
- Self-balancing control without oil balance pipe
- The maximum length after the first branch pipe is 120m
