VRF SYSTEMS & PROFESSIONAL CLIMATE EQUIPMENT

• EQUIPMENT CATALOG • TECHNICAL SPECIFICATIONS • APPLICATION EXAMPLE

VRF OUTDOOR UNITS

AMV Mini and Slim

Cooling capacity	12-33,5 kW
Heating capacity	14-35 kW
Maximum drive indoor units number	7-19

Heating:  -20 °C ~ +27 °C

Cooling:  -5 °C ~ +52 °C

AMV FLEX

Cooling capacity	40-246 kW
Heating capacity	45-276 kW
Maximum drive indoor units number	23-80

Heating:  -30 °C ~ +24 °C

Cooling:  -5 °C ~ +55 °C

AMV6 Heat Recovery

Cooling capacity	22,4-246 kW
Heating capacity	25-276 kW
Maximum drive indoor units number	13-80

Heating:  -25 °C ~ +24 °C

Cooling:  -10 °C ~ +55 °C

AMV6 Basic

Cooling capacity	22,4-246 kW
Heating capacity	25-276 kW
Maximum drive indoor units number	13-80

Heating:  -30 °C ~ +24 °C

Cooling:  -5 °C ~ +55 °C

AMV MINI AND SLIM

» Easy Installation: The outdoor unit of AMV is with small size and light weight. No need fork lifter and crane for movement and installation. It can be carried by elevator or stairs.

AMV FLEX

» The AMV FLEX system offers a compact, modular design that allows up to 4 units to be combined for flexible performance. It delivers reliable cooling from -5°C to 55°C and heating from -30°C to 24°C, with a powerful static fan pressure of up to 80 Pa.

AMV6 BASIC

» The system does not require an oil balance pipe.
 » Operating in heating mode up to -30°C. in Cooling up to 55°C.
 » Outdoor unit condensers are coated with GoldenFin which is made of Al-Mn anti-rust alloy, and coated with golden protection layer, it consists of epoxy resin & modified acrylic, silicon free. The anti corrosive performance is more than 200 % higher than Bluefin.

AMV6 HEAT RECOVERY

» The AMV HR 3-pipe system can be used to simultaneously cool and heat rooms and provide hot water or connect to an underfloor heating circuit.
 » Operating range for heat recovery units up to -25°C in heating mode, and up to 55°C in Cooling mode.
 » Low power standby function can be achieved for more energy savings.

VRF SYSTEM INDOOR UNITS

AMV compact cassette

Cooling capacity	1,5-5,6 kW
Heating capacity	1,8-6,6 kW
Sound pressure level	25-43 dB(A)

AMV cassette

Cooling capacity	7,1-14 kW
Heating capacity	8-16 kW
Sound pressure level	31-43 dB(A)

Wall-mounted unit

Cooling capacity	1,5-9,5 kW
Heating capacity	1,8-10,5 kW
Sound pressure level	25-43 dB(A)

Duct type low ESP unit

Cooling capacity	2,2-7 kW
Heating capacity	2,5-8 kW
Sound pressure level	22-37 dB(A)

Duct type high ESP unit

Cooling capacity	9,0-28 kW
Heating capacity	10 - 31 kW
Sound pressure level	34-55 dB(A)

Floor-ceiling type unit

Cooling capacity	2,8-14 kW
Heating capacity	3,2-16 kW
Sound pressure level	29-49 dB(A)

VRF SYSTEM CONTROLLERS

- Standard Wireless controller

- Standard Wired controller

- Central controller

- Additional WiFi module

- Dry Contacts module

- Modbus / BACnet gateway

CONDENSING COMPRESSED UNITS

AMV MINI and SLIM Series

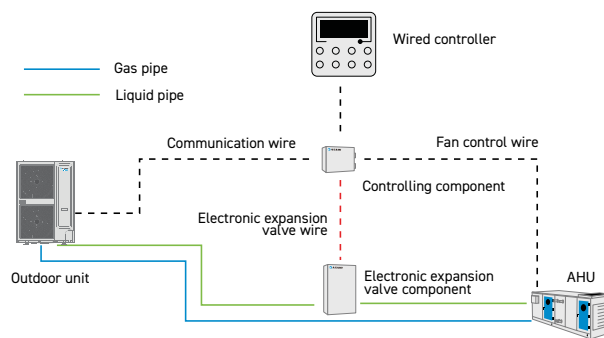

Cooling capacity 12-33,5 kW

Heating capacity 14-35 kW

Operation range:

Heating:  -20 °C ~ +27 °C

Cooling:  -5 °C ~ +52 °C

AHU-KIT one to one (single unit) connection (11.2kW ≤ capacity ≤ 33.5kW)

AMV6 and AMV FLEX Series

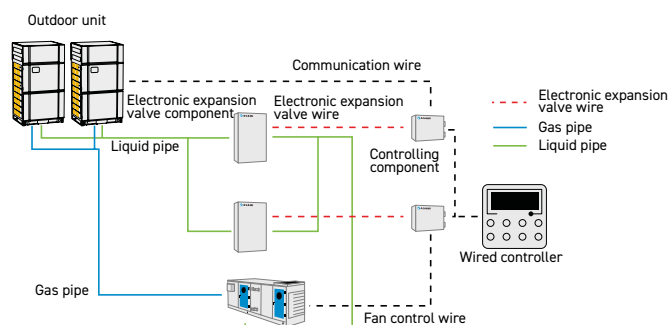

Cooling capacity 22,4-246 kW

Heating capacity 24-276 kW

Operation range:

Heating:  -30 °C ~ +24 °C

Cooling:  -5 °C ~ +55 °C

AHU-KIT one to one (parallel) connection (22kW < capacity ≤ 252kW)

Advantages

- SCOP up to 4.5 / SEER up to 7.2
- Refrigerant R410A
- Can work in mix system with VRF indoor units
- Possibility to connect up to 4 units to cascade

ACU Series Condensing units

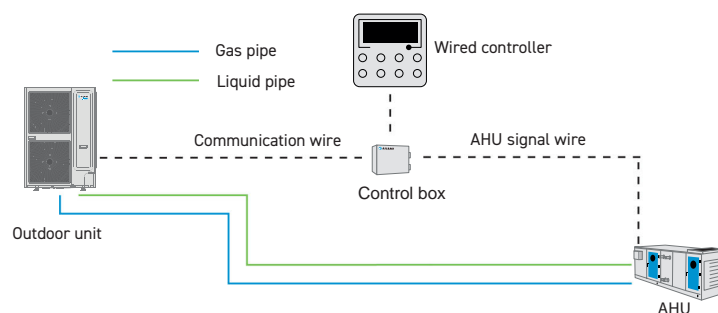

Cooling capacity 3,5-16,0 kW

Heating capacity 4,0-17,0 kW

Operation range:

Heating:  -20 °C ~ +24 °C

Cooling:  -20 °C ~ +52 °C

Advantages

- Energy efficiency class A++/A+
- SCOP up to 4.2 / SEER up to 6.5
- Low GWP refrigerant R32
- No need to install EEV valve

MULTISPLIT TYPE AIR CONDITIONERS

Cassette type

Cooling capacity	2,8-7,0 kW
Heating capacity	2,8-8,0 kW
Sound pressure level	30-45 dB(A)

Wall mounted type

Cooling capacity	2,2-7,1 kW
Heating capacity	2,5-7,8 kW
Sound pressure level	22-48 dB(A)

Multisplit outdoor units

Cooling capacity	8,0-12,1 kW
Heating capacity	9,5-13,0 kW
Sound pressure level	58-60 dB(A)

Operation range:

Heating:  -22 °C ~ +24 °C

Cooling:  -15 °C ~ +43 °C

Advantages

- Energy efficiency class A++/A+
- SCOP up to 4.2 / SEER up to 7.2
- Low GWP refrigerant R32
- DC Inverter compressor
- Standard wired or wireless controller

CASSETTE TYPE SPLIT AIR CONDITIONERS

Cassette type split

Cooling capacity	3,5-16,0 kW
Heating capacity	4,0-17,0 kW
Sound pressure level	29-44 dB(A)

Operation range:

Heating:  -20 °C ~ +24 °C

Cooling:  -20 °C ~ +52 °C

Advantages

- Energy efficiency class A++/A+
- SCOP up to 4.2 / SEER up to 6.5
- Low GWP refrigerant R32
- 360° Surrounding airflow
- Standard wireless controller YAP1F

MODULAR INVERTER HEAT PUMP

with integrated circulation pump

Cooling capacity 32, 60, 100, 130 kW

Heating capacity 35, 65, 105, 131 kW

Advantages

- Rotary type inverter compressor
- SCOP up to 3.9 / SEER up to 4.6
- Low GWP refrigerant R32
- Modular combination up to 3 units in a cascade
- Continuous heating

Operation range:

-20 °C ~ +40 °C

Heating: 

-15 °C ~ +52 °C

Cooling: 

Water outlet temperatures:

35 °C ~ 50 °C

Heating: 

5 °C ~ 20 °C

Cooling: 

Environmentally Responsible Refrigerant

The Modular Inverter Heat Pump uses R32 refrigerant, which has a Global Warming Potential Coefficient of 675.

Modular combination design

The modular combination design allows a maximum of 3 modular units as a cascade working with the same or different cooling capacities, so the total cooling capacity range is between 33kW and 390kW.

Integrated Hydraulic Module

The units have an integrated hydraulic module, which speeds up installation work and simplifies system commissioning. It consists of a circulation pump, expansion tank, filter, drain, air vent, and safety valves.

Continuous Heating

In a cascade operation, modules go into defrost cycle at different time intervals, ensuring a continuous heating function.

Controller CF492

This advanced touch screen controller gives easy operation, selection of many languages, possibility to control up to 3 modules in cascade, circulation pump work, and standard Modbus RS485 communication interface.

DC inverter Rotary compressor

Adopted with inverter rotary compressor, each with an adjustable capacity range from 10% to 100%. With DC inverter technology, the compressor operation frequency is in dynamic control to satisfy load changes, thus ensuring a highly efficient system for customers with optimal performance.

FAN COIL UNITS

Skystar, Skystar Jumbo

Carisma Fly

Fan Coil type	Cassette
Cooling capacity	1,9 – 13,6 kW
Sound pressure level	24 – 55 dB(A)
EC fan (option)	yes

Fan Coil type	Wall mounted type
Cooling capacity	1,2 – 3,8 kW
Sound pressure level	26 – 48 dB(A)
EC fan (option)	yes

Carisma Whisper

Maestro, Carisma CRSL

Fan Coil type	Wall type
Cooling capacity	0,9 – 3,8 kW
Sound pressure level	22 – 46 dB(A)
EC fan (option)	yes

Fan Coil type	Duct type
Cooling capacity	2,0 – 30,6 kW
Sound pressure level	25 – 72 dB(A)
EC fan (option)	yes

Carisma CRC MV

Carisma CRC IO

Fan Coil type	Floor - ceiling
Cooling capacity	1,0 – 7,4 kW
Sound pressure level	23 – 55 dB(A)
EC fan (option)	yes

Fan Coil type	Duct type
Cooling capacity	1,0 – 7,4 kW
Sound pressure level	23 – 55 dB(A)
EC fan (option)	yes

Controllers

- Modbus, KNX, wifi module
- wired, wireless controllers
- group controllers

HEAT RECOVERY UNITS

Energy Smart ceiling

Air flow	150-270m ³ /h
Max sound power level	36,8-44,9 dB(A)
Temperature efficiency	88-92,1%
Energy efficiency class	A, A+
Heat exchanger type	Plate PET/ Plate enthalpy

Energy Smart vertical

Air flow	180-600 m ³ /h
Max sound power level	38,9-52,4 dB(A)
Temperature efficiency	86,5-92,5%
Energy efficiency class	A, A+
Heat exchanger type	Plate PET/ Plate enthalpy

Energy Plus

Air flow	720-2600 m ³ /h
Max static pressure	170-250 Pa
Temperature efficiency	80-94%
Energy efficiency class	A, A+
Heat exchanger type	Plate

- **Included wired controller**

Industrial air heaters

- For cooling and heating
- A wide range with many options included EC fans, explosion-proof motors and etc.
- Special version with stainless steel casing and coil with stainless steel pipes and aluminium fins

- For cooling and heating
- Special circular unit heater for ceiling installation only, suitable for installation up to 14 meters height
- Air flow up to 12.000 m³/h
- Heating capacity from 10 up to 90 kW
- Cooling capacity from 3 up to 24 kW

Radiant panels

- Two series - *Pulsar* and *Duck strip*
- For cooling and heating
- Several versions for different hanging on the ceiling
- The wide range of colours available
- Each element can be easily connected by pressfittings or by welding the pipe

Door curtains

- With electrical heater, water coil or fan only versions
- 1, 1.5 and 2 meters width
- AC or EC ventilator motor
- Installation height up to 4.5 meter
- Concealed installation frame is available for integration in the ceiling

Electrostatic filters

- Installation possible on existing systems Low impact on the thermal and aerodynamic equilibrium of the installation
- Significant bactericide action on biological pollutants
- Very low additional energy costs
- Simple and fast maintenance
- Remote power supply that can power multiple filtering units at the same time

Evaporative coolers

- Reduces the air temperature in large volume buildings
- Is using nature's principle of water evaporation
- Supplies continuous great air changes in large volume buildings, improving the internal air quality
- 3 sizes for air flow: 10.500 m³/h, 11.000 m³/h and 21.000 m³/h
